

A5 Unbound Collated Sheets Portrait 148mm x 210mm

■ Bleed (3mm)

The bleed area extends 3mm beyond the edge of your finished document. Colours and images must extend beyond the edge of the document to prevent unwanted white borders around the edge of your finished document. Note that this 'bleed' will be trimmed during the finishing process so ensure that no important details are set up to print in this area

■ Safe Area (5mm)

It is recommended that your artwork is at least 5mm from the edge of the page if it is not meant to bleed off. Printed borders placed too close to the edge of a page may look uneven when the job is trimmed.

If you would like holes drilled in your collated sheets, please ensure that you leave a safe area of 20mm on the bound edge of each page.

Important: Anything beyond the white dotted line will be trimmed off

Remember: Content may be lost if insufficient space is left along the drilled edge so please leave 20mm minimum.

20mm "Drilled edge" Safe Area

digitalprinting.co.uk

The diagram shows a white rectangular area representing a safe zone, surrounded by a yellow border. This yellow border is further enclosed by a red dashed line. Two magenta circles are positioned on the right side of the yellow border, each with a horizontal double-headed arrow indicating a 20mm width. The text '20mm "Drilled edge" Safe Area' is written vertically between these two circles.
